HR Manager

Lentra

---

Dear HR Manager,

With a strong background in Java development and experience of 3+ years in designing scalable solutions, I am excited to apply for the Java Developer role at Lentra. My expertise in microservices architecture, cloud technologies, and backend development makes me a strong candidate for this opportunity.

During my tenure at Lentra, I played a key role in developing and optimizing the Loan Origination System, enhancing API performance, and upgrading projects from Java 8 to Java 17. My experience in building secure and efficient software solutions, such as a password management system with bcrypt and AES-256 encryption, demonstrates my ability to create impactful applications. Furthermore, my contributions to the HDFC Easy EMI App significantly improved user engagement and revenue growth.

Lentra aligns perfectly with my skills in Java, Spring Boot, Kafka, Hibernate, SQL, NoSql, AWS, React.js, OCI etc. I am confident in my ability to contribute meaningfully to your team's objectives by developing high-performance, scalable solutions.

I would welcome the opportunity to discuss how my experience and technical proficiency align with the needs of Lentra. Please find my resume attached for your review. I look forward to your response and appreciate your consideration.

Thank you for your consideration.

---

Best regards,  
Rahul Sharma
